***Allowable Subject Matter***

Applicant's amendment of 3-07-05 has been fully considered. The amendment has placed the application in condition for allowance by canceling claims 1-8, 10, 16-21, 25, and deleting the species having "benzylamide" as a substituent. Thus, the previous 103 rejection is withdrawn herein. New claims 26-28 are drawn to a method of treating inflammation, osteoarthritis, and rheumatoid arthritis, which is not taught by **Baader et. al.**

Claim 9 is directed to an allowable product. Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claim 15, directed to the pharmaceutical composition of the patentable product, previously withdrawn from consideration as a result of a restriction requirement, is now subject to being rejoined.

With no other outstanding rejections, pending claims 9, 11, 15, 22-24 and 26-28 are allowed.

***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

The invention is drawn to compounds of substituted *pyrimidine-4,6-dicarboxylic acid* of Formula IV, pharmaceutical composition thereof as well as method of treating inflammation, osteoarthritis, and rheumatoid arthritis using said compounds. The closest prior art, **Baader et. al.** (US'317), teaches a compound of *Pyrimidine-4,6-dicarboxylic acid*

*dibenzylamide*. However, said compound is used as a fibrosuppressant and immunosuppressant, and not used to treat inflammation, osteoarthritis, and rheumatoid arthritis. Therefore, the teaching of Baader et. al. does not provide motivation for one skilled in the art to use said compounds or derivatives thereof in the methods recited in claims 26-28.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***References cited on PTO-892***

Although references cited on PTO-892 teach compounds relevant to new claims 26-28, their effective filing dates do not antedate the effective filing date of this application. Therefore, they are not competent prior arts.
